

While growing up baking was an every day event but especially on a Saturday when my Mother would bake cakes, tarts and buns, all sending a wonderful aroma throughout the house and a feeling of great comfort. With five children in the house it wouldn't be long before all these goodies would be eaten with great gusto!

Another generation along...I found myself making cakes for children's birthdays and other special family events. Soon it happened that my friends began requesting cakes for all sorts of occasions, the cakes always brought much delight to both adults and children!

This brings me to today where Sophisticakes has become a growing, home based business. The secret to this success has not only been the delicious cakes I bake, but the special creative, artistic qualities and an extremely high standard of excellence that I set for myself. My forte lies in handcrafting and painting sugarcraft flowers, along with moulding figurines and accessories for all categories of cakes.

The beautifully finished pieces can then be kept as a memento from your special day and occasion.

I understand that sometimes a member of a family like to make the cakes themselves for special occasions, but do not have the confidence to ice or put the finishing touches to it. I will be happy to help out in these circumstances and will quote a price for the finishing of same.

At Sophisticakes, great care is taken that each cake is custom designed to your specification and will reflect your personal preferences and style. All cakes are made fresh to order and only the finest of fresh ingredients are used. All Cakes are priced according to individual design and requirements therefore prices are used as a guide. Free quotes are provided at private consultation and tasting can be arranged by appointment. I am totally committed to working with you to design the perfect, delicious cake whatever the occasion. No job is too difficult and I will work with you to make the cake of your dreams and more.
